PRIORITY 1 — Shift Cancellations & Shifts Getting Filled in Adelaide

STRATEGY

Edge has confirmed Raw Talent as their priority agency for Adelaide, making this the single highest-revenue opportunity on the table right now. The problem is supply — we do not have enough active, compliant educators ready to fill the volume of shifts that Edge will generate. At the same time, last-minute cancellations are eroding centre trust and fill rate. The goal of every action item in this category is to close that gap as fast as possible: re-engage dormant educators, fix the notification failures that are causing missed shifts, stop repeat cancellation behaviour before it gets worse, and build a loyalty mechanism that keeps our best educators choosing Raw Talent over competing agencies. Every action here is time-sensitive. The window to capture Edge SA is now.

#	Action Item	Owner
1	Request full Adelaide educator export from Prince — current status, last active date, last shift date, and compliance expiry dates	Sophia
2	Contact Jemima to design the email blast for SA educator re-engagement	Sophia
3	Draft email content simultaneously while waiting for Prince's list — do not wait	Joy + Sophia
4	Send mass email via JobAdder to full SA pool including dormant educators — highlight pay rates and direct to app	Jemima (send) / Onboarding Team (follow-up)
5	Create cancellation SOP with Lori — daily/weekly tracking, formal warning on first offence, removal on repeat	Sophia + Lori
6	Follow up with IT team on push notification fix for available shifts — get a committed delivery date	Sophia
7	Follow up with Jane on Webex SMS capabilities and pricing	Joy
8	Prepare SMS solution comparison for Liam — Webex vs RingCentral, Dialpad, Aircall	Joy
9	Block 7am–8am and 12pm–1pm daily next week for SA educator outbound calls	Joy
10	Conduct outbound SA educator calls starting next week — use re-engagement call structure	Joy + Sophia
11	Remind Liam to update ad headlines — specify Cert III / Diploma required, not just early childhood educator	Sophia

#	Action Item	Owner
12	Follow up with Liam on July Edge charge rate increase — flag before it gets lost	Joy + Sophia
13	Liam to visit TAFE SA and universities — distribute QR code recruitment posters	Liam

PRIORITY 2 — Onboarding

STRATEGY

Approximately 900 applicants are sitting in Vetting Call status. The majority are either unqualified, still studying, or simply unresponsive — and they are clogging the pipeline and consuming consultant time that should be going toward activation. The current onboarding process is also too slow: video interviews are done outside the app, reference checks cause repeated delays, and there is no qualifying filter at registration. The goal here is to restructure onboarding from the ground up so that only the right people enter the pipeline, they move through it faster, and the team is not wasting effort on applicants who will never activate. This is a 2–3 month build with IT, so the scope needs to be locked in completely before it goes to the dev team — one build, not multiple.

#	Action Item	Owner
14	Revise vetting call script to ask how educator heard about Raw Talent — if via QR code, get centre name for direct reference check	Jane (delegated by Sophia)
15	Sophia to conduct reference check calls directly with centres to fast-track onboarding and maintain client relationships	Sophia
16	Add Student status to CRM — raise with Prince this week with a committed delivery date	Sophia
17	Design full onboarding funnel restructure with Jane — qualifying question at registration, video interview in-app, redo option for video	Joy + Jane
18	Update JobAdder to reflect Cert III as a mandatory requirement	Jane
19	Ensure all onboarding restructure changes are fully scoped before going to IT — everything in one build, not incremental	Joy + Jane
20	Review and provide feedback on Onboarding Manager Roles and Responsibilities document	Sophia

Note: IT has indicated the onboarding restructure may take 2–3 months. In the meantime, SA vetting calls are prioritised daily and In Progress candidates receive a follow-up every two days.

PRIORITY 3 — Candidate Management

STRATEGY

Raw Talent does not currently have a structured process for managing educator relationships beyond initial activation. Educators are not being followed up, chats are going unanswered due to notification failures, and there is no incentive structure to keep high-performing educators loyal. At the same time, there is no visibility on individual consultant performance — which means we cannot identify who is doing well, who needs coaching, and where the quality gaps are. The goal of this category is to build the systems, SOPs, and visibility that turn a transactional educator relationship into a genuine community — increasing loyalty, reducing churn, and making Raw Talent the agency educators choose first. This also includes fixing the internal performance gap so management can see what is happening at the consultant level and act on it.

#	Action Item	Owner
21	Design structured educator referral program — define shift threshold, quality clause, and \$50 bonus trigger — brainstorm with Jane before presenting to Liam	Joy + Sophia
22	Manual referral tracking spreadsheet in the interim — Prince to update weekly with shift completions, ban flags, and centre feedback	Prince (update) / Sophia (oversight)
23	Create Raw Talent Facebook group for educators — must be under company account with admin handover plan for after Jane leaves	Jane
24	Push Prince to fix in-app chat notification failure — two ClickUp tasks already raised, needs committed deadline this week	Sophia
25	Create SOP for educator engagement and client relationship management — Joy and Sophia to draft first, then present to team	Joy + Sophia
26	Gather KPI and performance data from Lori, Adrienne, and Jane next week — foundation for Consultant KPI Dashboard	Joy

North Star Metric — SA Fill Rate

Baseline: ~72% overall · Brahma Lodge: 59.5% · 30-Day Target: 80%+ across all Edge SA centres
Owner: Jane/Joy (supply) + Lorie (client side) · Review: Weekly with Sophia, fortnightly with Liam
