Roles & Responsibilities

Onboarding Manager

This document defines the official Roles & Responsibilities for the Onboarding Manager at Raw Talent.

Role Information

Role Title	Onboarding Manager
Department	Operations
Reports To	Sophia Arwae — Operations Manager
Collaborates With	Joy Victoria — Business Consultant
Direct Reports	Onboarding Consultants — Offshore Philippines team (Dona, Gillian, Sheena, Marizza)
Working Hours	8:00 AM – 4:00 PM Melbourne Time (AEST / AEDT)
Location	Offshore — Philippines (Remote)
Version / Date	v1.0 · June 2026

Role Purpose

The Onboarding Manager leads the end-to-end educator onboarding function at Raw Talent. Their primary accountability is ensuring qualified educators move through the pipeline efficiently, compliantly, and at a rate that supports the business's fill rate and activation targets. They are responsible for both the quality of individual educator profiles and the productivity and professional development of the onboarding consultant team.

1. Daily Operational Planning

- Review booking team requests for priority suburbs and workforce demands before starting the day.
- Review all candidate pipelines and set daily priorities across:
 - HireFlix video interviews awaiting assessment
 - Vetting calls to be conducted or followed up
 - In Progress profiles with outstanding documents
 - Awaiting Activation profiles pending QA sign-off
- Review all pending ClickUp tasks and build the day's action plan.
- Allocate and delegate tasks across the onboarding consultant team.
- Flag any candidate sitting in Vetting Call status beyond 5 business days for immediate follow-up action.

A large volume of candidates currently sits untouched in Vetting Call status. Daily prioritisation must include a sweep of these candidates — not only those who have completed the video interview. Pre-qualification filters should be applied early to avoid consultants spending time on ineligible applicants.

2. Team Leadership & Coaching

- Conduct the daily onboarding team huddle at 11:00 AM Melbourne Time.
- Monitor consultant performance and productivity throughout the day via EOD reports.
- Review EOD reports weekly to assess per-consultant output: inbound calls handled, vetting calls completed, profiles moved by status.
- Check in with each consultant at least every two hours during the shift.
- Conduct weekly team catch-ups every Friday covering:
 - Challenges and blockers from the week
 - Call listening feedback and outcomes
 - Process improvement ideas and team observations
- Conduct regular call listening sessions using the Raw Talent Gold Standard Vetting Call as the benchmark.
- Run AI-assisted call transcript reviews (via Otter.ai + Claude) to identify patterns and coaching opportunities.
- Schedule all team meetings in advance with a clear agenda — no ad hoc meetings unless urgent.

Per-consultant performance is not currently trackable by status movement — the team's EOD report is the primary measure but doesn't show individual candidate progression. Call listening and AI transcript reviews need to be formalised as a regular accountability mechanism, not only when time allows. Meeting scheduling discipline is also needed — ad hoc meetings disrupt the consultant team's daily workflow.

3. Candidate & Pipeline Management

- Conduct vetting calls, primarily for South Australian applicants.
- Assess HireFlix video interviews daily and document assessments in candidate profile notes using the WelcomeCall template.
- Ensure no candidate moves to In Progress before both the video interview and the vetting call are completed.
- Support consultants with escalations and complex candidate cases.
- Ensure consultants are consistently following up In Progress candidates on outstanding documentation.
- Follow up with first-shift educators within 48 hours of their initial placement to:
 - Gather experience feedback about the centre and the shift
 - Assess app usability and onboarding experience
 - Invite them to add the centre to favourites and set availability
 - Surface any competitor intel about which agencies they have also worked with
- Proactively identify and log educator referrals once the referral program is live.

First-shift feedback calls are a high-value touchpoint that currently does not happen. This should become a standard post-activation task — it strengthens educator relationships, generates centre feedback, and surfaces competitor intel (which agencies educators see at their centres, what those agencies offer, etc.).

4. Compliance & Document Management

- Ensure all mandatory compliance documents are present and valid before moving a candidate to Awaiting Activation:
 - Passport / Birth Certificate / Citizenship
 - Qualification or Course of Study
 - First Aid Certificate — current, HLTAID-compliant, approved provider

- Working with Children Check (state-specific: VIC or SA)
- Do Food Safety
- RAN Training Certificate (SA educators only)
- Child Safety Training (mandatory from August 2026 — must be in system by July 1)
- Do NOT move a candidate to Awaiting Activation until reference checks are fully complete with at least one verified work email response.
- Conduct or supervise reference check calls following the centre callback protocol when email verification is delayed.
- Verify that all referees hold a position senior to the candidate.

A known process gap is that candidates are being moved to Awaiting Activation before references are complete. This creates inaccurate activation metrics and extra QA workload. This must be enforced as a hard rule — no exceptions.

5. Automation & Process Improvement (Active Priority)

- Identify and document steps in the onboarding workflow that can be automated to reduce manual follow-up.
- Priority automation targets identified by the team:
 - Automated follow-up notifications for In Progress candidates with outstanding documents
 - Note type triggering status change (e.g. saving a WelcomeCall note auto-moves to next status)
 - Automated email sequences for document chasers and compliance reminders
 - Pre-qualifying questions on registration to filter ineligible applicants before they enter the pipeline
- Raise automation requests to Raj / Prince via ClickUp with a clear brief and expected outcome.
- Ensure all finalised SOPs and call flows are saved to the shared team drive before being put into use — not stored in individual Google Drives.

The biggest operational bottleneck identified is that consultants spend the majority of their time manually chasing In Progress candidates for documents instead of making outbound vetting calls. Automation of follow-up sequences would free up significant consultant capacity for higher-value work.

6. Reporting & Documentation

- Prepare and submit the monthly onboarding report including:
 - Activation numbers (VIC and SA)
 - Funnel conversion rates (registered → vetted → activated)
 - Compliance completion rates by document type
 - Upcoming training and compliance deadlines
 - Open issues and pending IT requests
- Maintain accurate ClickUp task records — all delegated tasks must have an owner, due date, and status updated daily.
- Track per-consultant productivity weekly: vetting calls made, inbound calls handled, profiles moved by status.
- Feed centre intelligence captured during vetting calls into JobAdder as qualified leads for Liam's centre visit pipeline.
- Maintain the shared knowledge base with current SOPs, call flows, and training materials — update within 3 business days of any process change.

SOPs and documentation are currently not centralised — materials are stored in individual Google Drives and the knowledge base is incomplete. All finalized process documents must go to the shared team drive before being put into operational use.

7. Training & New Consultant Onboarding

- Train new onboarding consultants following the Raw Talent New Staff Onboarding Kit (in progress).
- Ensure all tools are set up before a new consultant's first day (Google Workspace, Slack, Raw Talent Portal, HireFlix, JobAdder, ClickUp, Webex, Otter.ai).
- Complete supervised call training before new consultants go unsupervised:
 - 10 shadow calls — observe only, no participation
 - 10 supervised calls — manager listening, debrief after each
 - 10 solo calls reviewed via AI transcript — manager sign-off required before going fully independent
- Conduct regular refresher training and coaching sessions for existing consultants.
- Document all training completions in ClickUp per consultant.

8. Key Performance Indicators

KPI	How Measured	Target
Educator Activation Rate	Activated ÷ total registered (SA + VIC)	25%+ (from ~10% baseline)
Vetting Call Completion Rate	Vetting calls per consultant per week	Min. 10 per consultant
In Progress Turnaround	Days from vetting call to Awaiting Activation	5 business days or under
Compliance Completeness at QA	% profiles reaching QA with all docs present	100%
Reference Check Accuracy	% using official work email (not personal)	100%
First-Shift Feedback Calls	Calls made within 48 hrs of first shift	100% of first-shift educators

9. Tools & Systems

Tool	How Used	Access
Raw Talent Portal	Manage candidate profiles, statuses, and notes	All Staff
HireFlix	Review and assess video interview responses daily	All Staff
Slack	Team communication, daily updates, pinned note templates	All Staff
ClickUp	Task delegation, daily planning, handover notes	All Staff
JobAdder	Log centre leads captured during vetting calls	All Staff
Google Workspace	Email, calendar, shared drive document management	All Staff
Webex	Outbound and inbound calls (vetting, reference checks)	All Staff
Dubber	Access call recordings for consultant quality review	Manager Only

10. Key Working Relationships

Internal	External / Candidates / Centres
Sophia Arwae — Direct manager and escalation point Joy Victoria — Process improvement, quality audit, and initiative tracking partner Adrian / Adrienne — Profile handover and compliance sign-off Lorie — Workforce requirements and suburb priorities Yuvraj / Prince — App bugs, system requests, and portal issues Liam Baxter — Strategic direction via Sophia (urgent matters only)	Educator applicants — vetting, onboarding, first-shift follow-up Childcare centres — reference check calls Training providers — qualification and certificate verification WWCC / DCSI — VIC and SA compliance screening bodies ACECQA — qualification framework reference

11. Escalation Path

Situation	Escalate To	How
Candidate compliance concern or suspected fraudulent document	Operations Manager	Slack (urgent) + ClickUp task
Consultant performance or behavioural concern	Operations Manager	Private Slack + written summary
App or portal bug affecting onboarding workflow	Operations Manager	ClickUp task + screenshots via Slack
Reference check concern raised by a centre	Operations Manager	Slack + written call note
Candidate complaint or dispute	Operations Manager	Slack + documented call note
Educator flagged for ban or professional development	QA Manager	ClickUp task + Slack

12. Sign-Off

Role Holder — Onboarding Manager	Approved By — Operations Manager
Name: _____	Name: _____
Signature: _____	Signature: _____
Date: _____	Date: _____
